**TO WHOM IT MAY CONCERN,**

*I have known TIAGO MOÇO FERREIRA since he was my student at the Higher Technical School of Civil Engineering at the Technical University of Catalonia during the 2010-2013 academic years.*

*On a personal level, from the very first moment I noticed his excellent behavior, his way of expressing himself and also his modesty. In the academic field, I noticed his quickness in assimilating knowledge and his desire to go as far as possible in his thinking .He is also interested in having an overall view of subjects, including not only the technical aspects but also their commercial and economic consequences.*

*I have had the opportunity to appreciate his analytical abilities, his rigorous focus on problems solving and his perseverance in overcoming difficulties as they arise.*

*The command that he has of the most useful mathematical techniques for engineering and of the most advanced IT tools give him a high-quality foundation to deal with challenges successfully. He is capable therefore of assuming responsibilities as an individual. However, this does not represent any impediment to him working as part of a team,*

***which I have had the chance to verify. On the contrary, because of his personality he helps to create a good atmosphere when he works in a team.***

***In conclusion, I would happily recommend him for the post in question, in the sure knowledge that you will never regret hiring him , not only because of his engineering knowledge but also because of his personal qualities.***

***Yours faithfully,***

***Prof.PhD.Eng. A.López Pita***

***Professor of Railway Studies***

***Technical University of Catalonia***

***Member of the Spanish Royal Academy of Engineering***

***Barcelona, 2 July 2016***
